

# Why choose West Coast Seeds?

Packaging is an indication of seed quality, and we proudly provide as much information as possible.

## Mission Statement

As one of the first signatories to the Safe Seed Pledge more than 25 years ago, we are deeply committed to keeping West Coast Seeds GMO and GEO free.

## Category

## Variety, Product Number

## Certified Organic

When the Certified Organic icon is indicated, the growers have certified their farms to be free of synthetic chemicals, and to meet criteria set out by organic certification bodies in Canada, US, and Europe.

## Description

Includes a guideline of approximate size and days to maturity. We indicate whether it is open pollinated (OP) or a Hybrid (F1). OP seeds are preferred for seed saving. Hybrid seeds are the product of cross-pollination between plants.

## Price, Weight, Quantity

Know how many seeds you're going to have for planting, and be assured we provide the largest, fattest, and most reliable seeds on the market.

## Germination

We routinely test seeds for optimum germination results.

## Packing Date

The date guarantees our seeds are good to grow!

## Lot Number

Our detailed records track seeds from grower to packet.

## Canada No 1 Seed

All our seeds meet or exceed Canada No. 1 Standards for quality and performance.

## Growing Instructions

Detailed growing instructions include timing, seeding, seed specifications, and usual seed life expectancy.

## Contact Info

Have a question? Ask us! Our website and Gardening Guide are fantastic sources of information.
